

# LMCA FIRST ANNUAL POSTER SESSION

LMCA is organizing its first annual **poster session** to be held at the LMCA annual meeting December 5-7, 2017. Posters are a wonderful way to show off your activities, without having to give a formal presentation in front of an audience. The poster session will also allow for equipment, traps and other items to be displayed and explained. Topics can include research projects, surveillance, mosquito biology, new techniques and strategies, control efficacy, GIS mapping, unique findings in your parish, or other various projects in the lab or field.

Posters should be **48" x 36"** in size. Most posters start with a large title at the top, with the author names and affiliations underneath. While there is no single way to configure a poster, an example of a typical lay out is provided. A poster formatted in PowerPoint can be provided upon request to facilitate the process. The presenter is responsible for printing and pinning the poster to the poster board at the conference. Please bring Velcro, pins and/or tape to secure the poster at the conference.

In order for LMCA to plan ahead for the Poster Session, please fill out and return this call for posters form by Friday November 3, 2017. For any questions please contact, Kristen Healy at [khealy@lsu.edu](mailto:khealy@lsu.edu) or Claudia Riegel at [criegel@nola.gov](mailto:criegel@nola.gov).

## CALL FOR POSTERS FORM:

**Title:**

**Authors:**
